

I CLAIM:

1. A warning light device for indicating releasing of accelerator pedal of vehicle, said warning light device comprising:

a light member, and

5 means for coupling said light member to the accelerator pedal of the vehicle, to actuate said light member to generate warning light and to indicate releasing of the accelerator pedal of the vehicle.

2. The warning light device as claimed in claim 1, wherein said
10 coupling means includes a control device coupled to said light member to control said light member.

3. The warning light device as claimed in claim 2, wherein said coupling means includes at least one battery coupled to said control device, and controlled by said control device to actuate said light
15 member.

4. The warning light device as claimed in claim 1, wherein said coupling means includes a generator for coupling to and controlling said light member.

5. The warning light device as claimed in claim 4, wherein said
20 generator includes a spindle, said coupling means includes means for connecting said spindle of said generator to the accelerator pedal.

6. The warning light device as claimed in claim 5, wherein said connecting means includes a gear rotatably engaged onto said
25 spindle, and means for actuating said gear to rotate said spindle in an active direction, but not rotate in a reverse direction.

7. The warning light device as claimed in claim 6, wherein said

gear includes at least one slot formed therein and having a greater side and a reduced side, said actuating means includes an actuator received in said at least one slot of said gear, and arranged to be engaged between said gear and said spindle when said actuator is
5 received in said reduced side of said at least one slot of said gear.

8. The warning light device as claimed in claim 7, wherein said actuating means includes a rack engaged with said gear and for connecting to and for being moved by the accelerator pedal.

9. The warning light device as claimed in claim 8, wherein said
10 actuating means includes a clip coupled to said rack, and for connecting to the accelerator pedal.

10. The warning light device as claimed in claim 7 further comprising a base having a roller to support said rack.

11. The warning light device as claimed in claim 7, wherein
15 said gear includes a cap attached thereto, to retain said actuator within said at least one slot of said gear.
